Wayne County, NY

Wayne County Public Health

Wayne County Public Health has scheduled fall flu clinics for adults and children ages 2 years old and over. Please note age, location and time changes. If you can receive flu vaccine at your doctor's office, you should do so. CDC (Centers for Disease Control) recommends that the following priority groups receive vaccine:

Influenza Vaccination is recommended for the following target groups:

- Everyone 6 months and older should get a flu vaccine with or without chronic medical conditions.
- All household contacts and caregivers of persons at high risk for severe complications from flu.
- Pregnant women
- All Health care workers
- All Household contacts and caregivers of children 0-59 months of age.
- Anyone else who wants to be protected from the flu

When you come to clinic, please bring all your insurance cards. The cost of the flu vaccine is \$40.00 and the pneumonia vaccine is \$90.00 for those without insurance a sliding fee scale will be provided. No one is turned away for inability to pay.

Please do not come early to clinic, please come dressed appropriately to receive a shot in your arm. Pneumonia vaccine will be available to those who meet the criteria.

Please call Wayne County Public Health if you need further information at 946-5749 or 1-800-724-1170.
